DETAILED ACTION

1. The amendment filed June 25, 2001 has been entered. It is noted that in view of the new amendment practice under 37 CFR 1.121 which became mandatory for all amendments on March 1, 2001, and due to the limited amount of examining time per application, if the amendment contains changes to existing language that requires a marked-up version showing those changes, the Examiner is relying upon the marked-up version(s) for examination of the application. It is applicant's responsibility to ensure that the clean version(s) is (are) the same as the marked-up version(s).

Drawings

2. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on June 25, 2001 have been **disapproved**. The response appears to include a proposed drawing change but the proposed drawing change does not show the proposed changes in red ink or otherwise highlighted as required by MPEP 608.02(v). (It is noted that this is necessary so that the PTO Draftsman, who reviews only the drawings, can readily review the changes).

3. The drawings are objected to because of the following informalities:

In Figure 8, the leftmost occurrence of numeral 64 has no lead line and should be deleted for clarity. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Carll, pn 2,313,801.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carll, pn 2,313,801.

Carll discloses a cutter apparatus with almost every structural limitation of the claimed invention but lacks a bottom board, a backup plate, and threaded members connecting the bottom board, backup plate and top board. However, the Examiner takes Official notice that such cutting subassemblies are old and well known in the art and provide well known benefits such as enabling

a particular cutting die to be quickly and efficiently installed as a unit; for example, replacing a cutting die subassembly of having one pattern with a cutting die subassembly from storage, the replacement cutting die having another pattern. Therefore, it would have been obvious to one having ordinary skill in the art to provide the cutter apparatus of Carll with additional structure to create an easily removable subassembly for the well known benefits including those described above.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark Dexter whose telephone number is (703) 308-1404.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Rinaldi Rada, can be reached at (703)308-2187.
